

## Remote Control Mounting Spacers P/N 390795

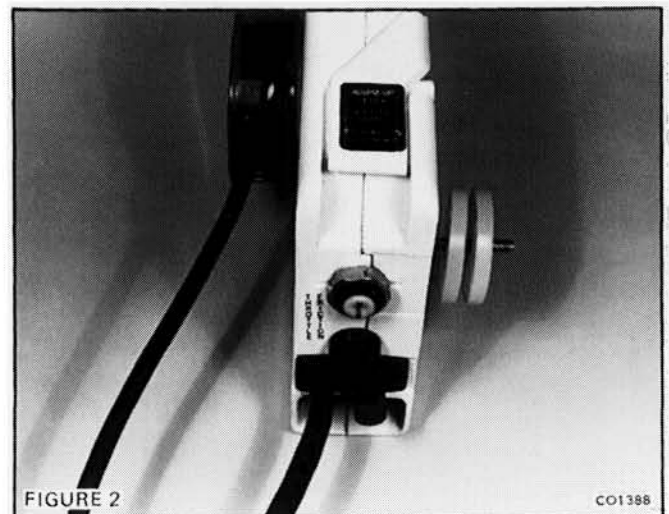

### Preface

To provide clearance between the warm-up lever and the gunwale of the boat on 1979 55 through 235 model Remote Controls.

1. Follow all remote control installation instructions supplied with the remote control up to, but not including, the actual mounting of the control to the boat.
2. Install the two long mounting screws supplied with the remote control through the two mounting holes in the control as shown in Figure 1.

Slide one or more spacers (P/N 325918) onto each mounting screw so the spacers will be between the remote control and the mounting surface. Be sure to install each spacer with the embossed part number facing the remote control as shown in Figure 2.

3. Proceed with remainder of remote control installation instruction.
