

**CDI P/N: 994-4463**

This unit replaces the 336-4463

**WARNING!** This product is designed to be installed by a professional marine mechanic. CDI Electronics cannot be held liable for injury or damage resulting from improper installation, abuse, neglect or misuse of this product.

## Installation

1. Remove the flywheel according to the service manual.
2. Remove the cover plate over the 336-4516 module.
3. Remove the hex nut securing the Green wire from the old condenser.

4. Remove screws securing the old condenser.
5. Using a heat gun, remove the mounting strap from the old condenser and let it cool down.
6. Mount the new condenser using the mounting strap removed from the old condenser, connecting the Black wire to one of the mounting screws. Make sure the Black wire is positioned so it will not contact the flywheel.

7. Connect the Green wire from the new condenser to the same location as the original Green wire.
8. Replace the cover plate over the 336-4516 module.
9. Replace the flywheel according to the service manual.
