

Mount Kit P/N 435602

Preface: These mounts replace the original mounts and their attaching screws, washers, and bumper components. This new mount design is stronger and has the deflection limiting function built in to eliminate the extra parts.

Installation: Remove and discard the original mounts and bumper parts. Follow service manual procedures to install new mounts, P/N 435272.

Use the included screws, P/N 338302, to attach the steering arm to the new mounts.
