

INSTRUCTION SHEET FOR 981462 MANIFOLD

1. This manifold will require that studs (provided in parts bag) be installed into manifold to proper stud height. Install studs using a stud driver. Apply Gasket Sealing Compound (P/N 317201) to the stud end threads before installation. Be sure stud end thread and manifold hole thread is compatible. See diagram for proper installation height.

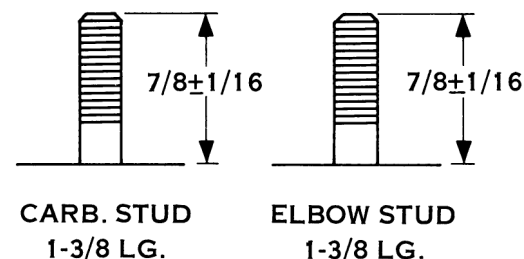

2. On 1977 and later models, remove pipe plugs at bottom rear of manifold and replace with drain petcocks from old manifold. Prior to installation, coat threads with Gasoila (P/N 200763). Tighten petcocks securely.
